Drilling Report No. 11 Pritchard-1 Well at 0600 hours PEP 151 Otway Basin Victoria

Essential Petroleum Resources Limited advises that at 0600 hours today the Pritchard-1 well had reached a depth of 2440m. The current operation is drilling ahead in inter-bedded mudstone, siltstone and sandstones within the Sherbrook Group. EPR expects the mudstones to increase in thickness, providing adequate seal for anticipated reservoir quality sands. Background gas readings persist as high as 500 ppm and the overall trend indicates an increase in gas readings with depth. The deeper targets within the Sherbrook Group have the potential to host in excess of 10 million barrels of oil.

EPR is deepening the well as a sole risk operation. The non-participating joint-venture parties can elect to participate in the deepened Pritchard-1 well by paying their share of costs plus a premium as set out in the farm-in agreements.

Participating interests in Pritchard-1 are:

Essential Petroleum Resources Limited	50%
Bass Strait Oil Company Ltd	25%
Inland Oil Resources Pty Ltd	25%
